General Safety Information

- Electric connection must be appropriate according to all applicable standards and other national and international safety and accident prevention regulations.
- Damaged luminaires must not be operated.
- No liability is accepted for damages resulting from improper use.
- Use genuine parts only for repair.
- Ensure stability of the ceiling and fastening elements.

Operation of the luminaire

- Exceeding the permissible ambient temperature will reduce the luminaire's lifecycle, resulting in premature failure in extreme cases.
- Avoid ESD problems by not routing feed-through wiring directly along the wiring of the luminaire.
- Connect control inputs of dimmable luminaires with standard cables suitable for power supply voltage.

Kontrolle nach der Installation

30 Minuten nach der Inbetriebnahme muss die Status-LED grün leuchten. Wenn die LED nicht leuchtet, ist die Ladung durch fehlende Netzspannung, unterbrochene Leitung zum Akku oder defekte Ladeeinheit nicht gewährleistet.

Selbsttest

Alle Leuchten der Baureihe enthalten ein automatisches Testsystem und überprüfen sich eigenständig. Bei den Leuchten wird wöchentl. die Einsatzbereitschaft der Elektronik, der Lampe und des Akkus geprüft. Zusätzlich wird jährl. die Kapazität des Akkus durch Simulation des Netzausfalls gemessen. Der erste Kapazitätstest erfolgt 24 Std. nach der Installation oder einer Fehlerbehebung. Nach dem Selbsttest muss die Status LED kontrolliert werden.

Check after installation

30 minutes after start up must the green LED on. If the LED is off, it must be detected that the charging is not inhibited due to a missing voltage supply, due to a line interruption to the battery or due to a faulty electronic.

Automatic Test

All luminaires of this series are assembled with an automatic self test system, testing the luminaires independently. Weekly tested are the electronic system, the lamp and the battery. Additionally, every year the battery capacity is measured by simulating a mains power failure. The first capacity test is performed 24 hours after installation or fault repair. The indicator LED must be checked after the first self-test.

**Prüfungen**

Einzelbatterieleuchten sind gemäß der Örtlich geltenden Vorschriften regelmäßig zu testen. Hierbei ist es ausreichend den an der Status-LED angezeigten Status der Leuchte visuell auszuwerten und ggf. unverzüglich entsprechende Maßnahmen einzuleiten um anstehende Störungen zu beheben. Die Ergebnisse der Überprüfung sind in einem Prüfbuch festzuhalten. Eine manuelle Überprüfung der Leuchte ist nicht möglich.

Quittieren

Wenn beim Test Fehler auftreten, werden diese durch die farbige Status LED an der Leuchte angezeigt. Um die Fehleranzeige nach Behebung des Fehlers zurückzusetzen, muss die Versorgungsspannung der Leuchte kurzfristig abgeschaltet werden.

Tests

Self-contained luminaire must be tested regularly in accordance with local regulations. It is sufficient to visually evaluate the status of the light displayed on the indicator and, if necessary, to take appropriate measures immediately to eliminate any faults. The results of the inspection are to be recorded in an inspection book. A manual check of the lamp is not possible.

Acknowledging error status

If failure will displayed, these are indicated by colored status LED on luminare. Reset the error status after testing, the luminaire has to be disconnected from mains voltage temporarily.
