

## ESKINA D

spot sur tige extérieur, anthracite, LED, 14,5 W, 3000 K/4000 K, IP65

Une nouvelle gamme dans le monde des luminaires SLV ! Avec la gamme ESKINA, nous vous offrons des possibilités complètes pour l'éclairage extérieur. Qu'il s'agisse de lampadaires, d'appliques, de plafonniers ou de spots sur tige. Vous trouverez le luminaire adapté à chaque application. Tous les luminaires peuvent fonctionner au choix à 3000 K ou 4000 K. Des versions avec détecteur de mouvement sont également disponibles.

## INFORMATIONS TECHNIQUES

|                                         |                                |
|-----------------------------------------|--------------------------------|
| Réf.                                    | 1002905                        |
| Orientable ou inclinable                | Dispositif rotatif et pivotant |
| Code IP                                 | IP65                           |
| Classe de résistance aux chocs          | IK 02                          |
| Résistance aux chocs                    | 0.2 Joule                      |
| Variable                                | Oui                            |
| Technologie de variation de l'éclairage | Variateur en fin de phase      |
| Nombre de câblages en continu           | 20                             |
| Tension nominale primaire               | 220-240V ~50/60 Hz             |
| Courant / tension secondaire            | 350 mA                         |
| Classe de protection                    | I                              |
| Puissance en watts                      | 14.5 W                         |
| Hauteur du courant d'appel              | 30 A                           |
| Durée du courant d'appel                | 40 µs                          |
| Lumen                                   | 1000 lm                        |
| Température de couleur                  | 3000/4000 Kelvin               |
| Angle de rayonnement                    | 95 °                           |
| Coloris                                 | anthracite                     |
| IRC                                     | 80                             |
| Durée de vie                            | 36000 h                        |
| Répartition de l'intensité lumineuse    | rotosymétrique                 |
| Sortie lumineuse                        | direct                         |
